Figure 13 shows the output of the system for the four states. The output is a 16-bit value, which is the result of the XOR operation between the input and the mask. The output is shown in hexadecimal format. The input is shown in hexadecimal format. The mask is shown in hexadecimal format. The output is shown in hexadecimal format. The input is shown in hexadecimal format. The mask is shown in hexadecimal format. The output is shown in hexadecimal format.
